NASDAQ Breakout Trade Review

NAS100 | WIN | 10/18/2026

Excellent trade execution. The FVG formed perfectly during NY killzone and price respected the order block. Entry was precise at 19480. TP1 hit within 45 minutes. Key lesson: patience during killzone setup pays off.

LESSONS LEARNED

Always wait for killzone confirmation before entry. The FVG + OB confluence is powerful.

EURUSD - Stopped Out Too Early

EURUSD | LOSS | 10/18/2026

Moved stop loss too tight before the news release. The analysis was correct but position management needs improvement. Should have given more room during high-impact news.

LESSONS LEARNED

Widen stops during news events. Trust the analysis but manage risk accordingly.

#mistake #stoploss #management

Gold Short During London Session

XAUUSD | WIN | 10/18/2026

London session provided excellent liquidity sweep above 2350. Order block held perfectly. Quick 1:2 R:R achieved in 2 hours.

LESSONS LEARNED

London killzone sweeps are reliable entry points for gold. Watch for equal highs.

#gold #london #sweep

Weekly Strategy Review

ALL | 10/17/2026

Overall good week. 4 wins, 2 losses. Main issue was overtrading on lower timeframes. Need to focus on 1H+ setups with higher confluence.

LESSONS LEARNED

Quality over quantity. Minimum 4H chart analysis before any trade.
